

**Divisional of U.S. Appl. No.: 09/963,382**  
Preliminary Amendment dated: October 1, 2003

**REMARKS**

Applicants have amended the specification to cross reference the parent application of which this application is a divisional.

Applicants have amended claims taking into consideration the prosecution in the parent application. The original claims 1-12 have been canceled from the application and new claims 13-29 have been added to more particularly define the invention.

Applicants believe that these claims are in full compliance with 35 U.S.C. §112 and are clearly patentable over the references of record in the parent application.

The present application is a divisional application and the prior art cited in the parent application should be taken into consideration in the present application. In accordance with MPEP §2001.06(b) no copies of the prior art in the parent applications are submitted herewith. The reference cited forms from the parent application is submitted herewith for the convenience of the Examiner. In accordance with MPEP §609, a Form 1449 listing these references is also submitted herewith. Confirmation that the prior art cited in the parent application has been considered in the next Official Action is most respectfully requested.

In view of the above amendments to the claims an early and favorable action on the merits is now in order and is most respectfully requested.

Respectfully submitted,  
BACON & THOMAS, PLLC
